## One And Twenty

LONG-EXPECTED one and twenty
Ling'ring year at last has flown,
Pomp and pleasure, pride and plenty
Great Sir John, are all your own.

Loosen'd from the minor's tether, Free to mortgage or to sell, Wild as wind, and light as feather Bid the slaves of thrift farewell.

Call the Bettys, Kates, and Jenneys
Ev'ry name that laughs at care,
Lavish of your Grandsire's guineas,
Show the spirit of an heir.

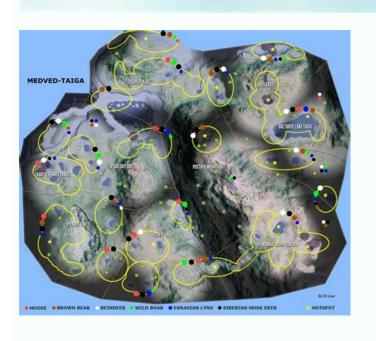

All that prey on vice and folly
Joy to see their quarry fly,
Here the gamester light and jolly
There the lender grave and sly.

Wealth, Sir John, was made to wander, Let it wander as it will; See the jocky, see the pander, Bid them come, and take their fill.

When the bonny blade carouses,
Pockets full, and spirits high,
What are acres? What are houses?
Only dirt, or wet or dry.

If the Guardian or the Mother
Tell the woes of willful waste,
Scorn their counsel and their pother,
You can hang or drown at last.

Manage my push subscriptions Regarding games, almost all of us can agree on one name, PUBG. However, we all remember the date when the government
banned PUBG. Well, that is a matter of controversy, and here we do not want to bring back the past. Now coming back to the point, the game was famous among the players of India. It provides another universe and lets gamers play and win with their trusted companions. The game somehow became a part of every Indian family. It was so entertaining
the parents could not hold themselves back from tasting the extraordinary features. When the game got banned, almost every user collapsed as the game became a part of their life. But looking at the popularity, few companies take the responsibility to bring it in India to a new level. And from there, the journey of Battlegrounds Mobile India or BGMI
APK started. On 17th June 2021, android users first started playing the game; later, the app was developed for iOS users. NameBattlegrounds Mobile India? As we said, the earlier version of BGMI
APK, popularly known as PUBG, was a Chinese game. When it got banned, the incident was criticized by several influencers and normal citizens over the internet. Now the entire situation gave witness to PUBG's unimaginable popularity. That is why PUBG studios and Krafton, a South Korean video game company, started developing the game and
introducing a new chapter of Battleground. Back then, it was known as PUBG Mobile India. And in November 2020, Krafton announced both the companies were registered under the Ministry of Corporate Affairs, Government of India. And soon, in May 2021, Karfton released the news of a new game named Battlegrounds Mobile India. About the
Game- BGMI Apk is a PVP shooting game. Now, what is PVP? Well, it is commonly known as Player-versus-player. Here multiple players can participate in the games' popularity. We usually play PVE or Player-verses-environment games
where the game itself creates obstacles and provides sufficient resources so that the player can beat all the difficulties. But in BGMI Apk, almost 100 players can play against each other. Some of them can make the team ditch the other players but eventually end up in a deathmatch. Here they have to fight against each other. And the one who survived
and managed to stay alive till the end won the match. However, it is easier to say than do. No wonder the game is so engaging and full of surprises that players never face boredom. Nowadays, players, along with their groups and family, compete against another family or a group
These incredible players take the game to the next level for sure. Map of the Game- In the beginning, the player finds themselves jumping from a plane with a parachute. Now the location is preset. You will get six maps in the initial period, and you have to decide where you want to play along with your troops. Before entering the game, the captain
decided where they wanted to fight against each other. Those places' names are Erangel (Normal), Miramar, Sanhok, Vikendi, Livik (normal), and Karakin. Story Of the Game- In the Beginning-Now the game is not only famous because it allowed the players to fight against their enemies, but the game let them take full control over the game. Suppose
you are the player on a plane with your mates to fight against your enemies. Now, starting from the beginning will show you different air routes. Now you and your friend must determine to jump off the plane. That will determine your decision-making ability. One thing you must need to know before you start to play. The game will
provide you with all the necessary equipment one after another during the game. That means you will only get customized clothes with no benefits rather than a great commando look. Soon the players touched the ground; they had to take shelter to save themselves from the enemies. Search for Weapons-And from here, the amazing journey will be
started. Now, it is time for you to show your ability; you have to make sure that none of you or your team members gets shot, and at the same, you have to search all the other locations to find necessary weapons, vehicles, medical resources, and
anything that help you to win the battle. However, one thing you must remember is that you will not get all of these in the same place, and even the oldest player can not tell when the position of the resource will be changed. The items will be distributed throughout the map evenly. And whoever reaches there fast can achieve it. However, the game
itself decides the location. Suppose you are in high-risk zones and can have a more advanced weapon than the other location. You can also rob other players of roles you can choose to play, first-person and third-person. Though each one has its benefits and back draws
in the game. However, using server settings, players can set their goals in a particular direction in case it is a team game. The Supreme Boss-Therefore, the challenges are not limited to equipment; even the maps have played a tricky role here. Suppose you are playing in a team of 10. Now the map itself shrinks continuously towards a
particular location. And the surrounding area of that particular location is known as a safe zone. Any team members who failed to reach that safe zone within time get affected and eventually eliminated. That means the automated intelligence of the games sets a bigger level of a match for the players on its own, and players cannot even suspect it
before it starts. The game shows its area with a shining blue wall that continuously shrank with time. The main reason behind it is to highlight the Battleground. Again, the game is like a superior god who lets everyone fight against each other and awards those who stay alive till the last fight. Kindness Of the Game-The game also helps by showing recommendations.
marks and bombs on the map, which inform the players about the threat. The players can use a flare gun if they need to be rescued from a certain place. Even a plane also appears on the screen at that time and droop resources. Now the plane is very important because it often provides unique resources that players cannot usually obtain. But the
back draw of the resource package is that it is visible to every player. And usually, all the eager players to obtain the package is marked as red or yellow smoke on the map. The game not only sets you in a fight but also provides several rewards and bonuses. It is like a company that celebrates achievements
rewards you with immortality, assists when required, and even pays you game currency. After each round, you get paid, and you can use those currencies to buy several cosmetic items during the game itself is the supreme boss, who gives contracts to the players to kill each other. And there are no compared to supreme boss, who gives contracts to the game itself is the supreme boss, who gives contracts to the players to kill each other.
only player left undead at the end becomes the winner. Features Related to Security: Battleground Mobile India- Anyway, come back to reality, the game has several unique features in the different sections, and here we will discuss them in divisions. For example, it has imposed some limitations that might seem back draw to players, but if we look at
the bigger aspect, it is somehow benefited us. Indian Features- Krafton, the mother company of the BGMI Apk, declared in the press conference that the game was specifically created for the Indian market. The events, outfits, matches, and leagues are based on Indian users. It is said that PUBG is the inspiration behind the game, and somehow it is
true. However, the appearance of the character appeared on the screen half-naked, in BGMI, you will see a green-coloured liquid from the dead
player's body. In short, the game maintains the restriction related to violence. Restricted for Indian citizens. The developers from the very beginning cleared that the game was specifically created for Indian citizens. The developers from the very beginning cleared that the game was specifically created for Indian citizens.
leagues. And Indian players will not be able to play games with players from different countries. Now there is a reason behind this decision. It maintains the safety and security of the players, the government has come up with this decision. Underage Players Are
Restricted- The game's privacy policy implies that if the player is under 18, it has to maintain a few rules. Underage players need to comply with their parents to play the games. They have to provide their guardian's numbers to verify the permission. BGMI Apk would block the player's account for the next 24 hours if they spent more than 3 hours in
the game. In fact, under 18 players are not allowed to spend more than 7000 to purchase items in the game. Data- Now about data, while PUBG got banned, it had been accused of stealing and misusing the data of Indian users. The government takes it as a threat to the security of players and the country. Now, as a gaming app, BGMI Apk has to store
the data of its players, but this time the data will be stored on the local server. However, Krafton also said they would prioritize the players and the country's security and safety. And they, along with the developers, ensure the data's security. Features Related to the Gameplay: Battleground Mobile India-Now because the game is specifically released
for Indians, it must surely have some unique features. Here we are listing five of them. Updated Mattrix Mod: in the Erangel Map, also known as the normal one, you will get a new mode named "Mattrix". In this mode, a new device has been introduced to the
players, the Air Summing Device. You can use the device to drop your resources. However, finding the device is difficult, and you must be very lucky. Even the game can play tricks to prevent you from getting the device is difficult, and you must be very lucky. Even the game can play tricks to prevent you from getting the device is difficult, and you must be very lucky.
play an important role in any game; the faster the vehicles are, the better chance you will get to win the game. Now BGMI Apk has introduced a feature known as Hyperlines stations located on the Erangel map. Air Conveyer- Air
Conveyers can be found throughout the BGMI Apk. These air conveyers can be used for several things, like long-distance travel, faster travel, attacking enemies, dropping supplies, and many more. Anti-Gravity Bike- This highly efficient bike can let you run on land and water. It is an example of Levitation Technology. Usually, it behaves like a normal
bike as long as you are running on the land; once you jump onto the water-land, you can explore the bike's original features. Guardian Robot- These robots are placed to help you throughout the entire game. But it does not look like a human but rather like a dog that will ask you to turn it on when you get closer. The idea of this robot is probably based
on the story of the dog, who used to help the soldier during the battle. The dog robot in the game scans the entire place to mark supplies and behaves like a pet. Features Related to Supply Crate: Battleground Mobile India-Now, if we compare BGMI Apk with PUBG, you will be amazed to know that the game provides a few supplies crates you can
obtain throughout the game. Here we are only listing the special five; however, you can find many others. You can take them as rewards from the supreme boss (that is, the game itself) The Seven Sea Set outfit will allow you to be disguised as a dangerous
British sailor. No wonder the outfit is quite unusual. You can also get an outstanding emote along with the outfit. Skeleton Anchor: Pan- Now, if you are an experienced PUBG player, then you have probably experienced the power of the pan. Here in BGMI Apk, you will also get pans with a special touch. The pan comes with several skins that are very
attractive. However, the skeleton anchor gets a place for its deadly look on our list. Black Thorn Set- Another rare set that is hard to achieve. Now, if you are a fan of pirates of the Caribbean, you are probably looking for the right outfit. The black and red outfit is perfect for showing off in front of your friends in the game lobby. Master of the Land
Set- If you are looking for a strong and cruel-looking outfit that will express your power over the land, then the outfit is perfect. It is probably an outfit of a wild hunter who has faced and overcame several circumstances in his life. Master of the Land- Kar98K- If you have already obtained the Master of the Land Set, you surely need the Kar98K skin.
Well, you must have an extra coupon to get the skin. The black and brown coloured texture will fit perfectly with your Master of the Land outfit. How Can You Get Supply Crate? Usually, each of these supply crate coupons to get the skin. The black and brown coloured texture will fit perfectly with your Master of the Land outfit. How Can You Get Supply Crate? Usually, each of these supply crates costs 300 AG Coin. Again, you can get 2700 AG coins if you open 10 Crates at once. On the other hand, if you receive supply crate coupons to get the skin. gun is famous for its long range. However, the power is not limited there; it can also be a monster at close range makes it the real monster of Battleground.M762- if you are looking for an option that can stand against AKM, this one is for you. The fire rate is
incomparable, though recoil and uses are more difficult than others. However, players who have a lot of experience usually go for M762.AKM- Most favourite gun of both beginners and pro players, the guns are not good
compared to M416. However, the gun's hipfire is something we cannot ignore. In our opinion, the gun is somehow best for TDM matches. Groza- Another assassin rifle that can be used to dominate any match or league, especially when the enemies are hiding behind the next closest door. PP-19- Another famous SMG comes with 9 mm ammo and 53-
round magazines. The ability hit-damage of 35 makes it perfectly fit for solo and squad war. The gun is one of the most useful weapons to win the war. Uzi- Another closed-range weapon, very useful to fire a deadly streak in a moment. The ability to damage the opposition in a short period makes it more demanding. Again, as one of the deadliest
weapons, the stability and lower recoil make it more comfortable for a close-range fight. The person with this gun in his hand can surely wipe off any opponent within a short period. M249- Earlier, the weapon was only reserved for airdrop; however, since V1.5 has
been released, players can find the weapons for both solo and squad games. However, the gun can only be received through an airdrop. All Weapons: BGMI- Though we have enlisted a few special weapons here, honestly, to become an
undefinable fighter, you need to memorize the entire list of weapons to calculate the percentages of benefits each time you find one. Here is the list-Throwable- This particular weapon is appropriate for high Damage. It is a close-ranged weapon that has six varieties. They are-Apple. Snowball. Stun Grenade. Smoke Grenade. Molotov
Cocktail.AR- AR or Assault Rifles comes under the first category of firing weapons, with automatic burst and single-firing mode options. The weapon is appropriate for both long and short ranges combat. Here is the list-Ammo -7.62 mm; Fire rate- 600 rounds/minute; Damage power- 49 HP.M16A - Ammo-5.56 mm; Fire rate- 600 rounds/minute;

melee can save you from losing your life. These fours come under Melee. Machete. Crowbar. Sickle. Pan. Crossbow- Honestly, I think the auto intelligence of the game place Crossbow just to do some prank on the fighters during a highly exciting moment. Holi- Theme: BGMI However, apart from all the benefits and drawbacks, the game is truly Indian.
And Krafton has proved it by providing an exclusive Holi Dhamaka Theme. The theme was released right before the Holi in March. The special theme allowed the players to adapt Holi Dhamaka Theme, can be adapted by updating the BGMI
Apk. Conclusion- If you are a bit conservative in choosing a game and think PUBG is way better than BGMI Apk, then we would like to draw your attention to the equalities. Both games fall under FPS games that shoot the opponent to take them down. Both the games have the same features and same weapons and almost everything. However, what
discriminates BGMI Apk from PUBG Apk is its security service. BGMI restricted underage players and countries' security. BGMI often comes up with exclusive themes and costumes to engage the audience. To not neglect the
violation rules, the developers avoid bloodshed. Therefore, the game is entertaining and perfectly suitable for both underage and adults. Moreover, BGMI becomes a part of Indian families within a few months of release
