Digitle (23/03/22) Everyone played Wordle, the wonderful game of words now on the New York Times website. Students can now try Digitle. This easy game to play use figures (and sometimes letters) and the puzzle answers are based on answers to mathematical questions. Just like the real game, students enter their answers and are told which characters are correct and in the correct position. Digitle is completely free to play and students can play on their results with others. The BC calculation with 15 puzzles also together with the Sat/Act version with 20 puzzles is also complete. The AP statistics are underway with new enigmas added every few days. Try it. You will be employee. Click on the following connections to get puzzles. They even had themes for them, like a haunted house or a hiding place for gangster. I decided to create an escape room based on mathematics. It is called nuclear containment. Students and their friends visit a nuclear energy structure when one of the technicians manages Amuck, threatening to flood the immediate area with radiation. It is up to the students, who work together, determine a C Odice who will be inserted on a computer that stops destruction. ÃÂÃ Â AB Manual YouTube Videos BC Manual YouTube Videos ÃÂÃ Â Here is my YouTube channel: ÃÂÃ Â I was both concerned and fascinated about COVID-19 when it was just a small story about an outbreak in China in early 2020. Both, because teaching calculus has allowed me to understand the frightening power of exponential growth. As the outbreak grew larger and larger, attacked the world and then the U.S. and turned our way of living on its head, I decided that the best use of my quarantine time was to help teachers. These are the people who are tasked with preparing students for the AP Calculus or AP Statistics exam, despite not even finishing the teaching part of the course and never seeing the students face to face. AAA A In the past 40 days, I have written 20 free response questions and 160 true/false questions in calculus and statistics, all covering topics that will be tested, all with a grading spreadsheet, all with solutions, and all completely free. ÄÄÄ Ä I am not on the front lines helping those amazing people in hospitals, in supermarkets, food banks, and keeping order. But I am doing my part to help the teachers and students, many of whom are at a loss right now.ÄÄÄ Ä Please download any and all of the material below with my compliments and please stay safe. We will get through this. AAA Practice AB and BC True/False Exam (4/13/20) AAA In my attempt to communicate directly with students to help them prepare for the revised AP Calculus exam which will be administered on May 12, I have put together a free 60-problem AB true/false exam in which the questions are intended to be answered in a minute or less. Included is a grading Excel spreadsheet which will allow students to track their strengths and weakness. ÃÂÃ Just added: the free BC exam is 50 questions and is now available. AAA Click on the link for information. AAA Revised AP Exam Review (3/23/20) AAA With much of the world in lockdown, the College Board is electing now to revise the AP exam. I think that this is ultimately a good move as it will keep you and the students busy and give them a reason to go on in this very depressing and scary moment. I have been hard at work in constructingÃÃÃ ample questions that hopefully will be similar to the community effort to support each other.ÃÃÃ Both AB and BC are now available. AAA AAA Flattening the Curve (3/18/20) AAA The world has changed radically because of the coronavirus with many of us self-quarantining and school is cancelled, maybe for quite awhile. We are told to practice social distancing for the purpose of "flattening the curve." What does that really mean? AAA We look at the concept in terms of normal curves. È velop a problem of summer mathematics have you ever dreamed of mathematics? It's I do it every now and then. I had this dream involved met to manage a workshop at school one morning. For some reason, Participants were only men. A similar laboratory was performed in another room for women. In both workshops, everyone was required to tighten their hand. Ove in the afternoon, both groups gathered and all men have tightened their hands with all women. For some reason in the dream, I was interested if there were more total handles in the morning or in the afternoon. Strange thing to dream! I tried to calculate if there were group size when the total morning handles and the afternoon handles were the same. I couldn't find one, but then slept. It was not until I got up and 4 hours later, the dream came to me when I bicycle. I went home and put a problem together. So regarding the number of hands, which is correct? It is more important, can you demonstrate your answer? (A) There are always more handshakes in the afternoon handles are the same. (D) There is a finite number of group size in which the number of morning handles and afternoon handles are the same. R.I.P. - Newton, the Calculus cat Newton has made a number of precalcolo appearances, calculation and statistical problems in my materials. Many students fell in love with his and in 2006, I decided to do it part of the website. One of my former students Sam Tsui (now a great star of YouTube singing), has attracted him to our logo. And when I decided to make cartoons for my mine Newton played a prominent role. He has been a biker, an archaeologist, and a teacher. He has dived into pools, helped a swami, joined a carnival, and hung from a catenary. He has left this world but he still lives in all these drawings. I won't soon forget him. He was my friend.
