Q.5 What can you find on the front of the computer case?
Circle the correct answer:

a) mouse

b) keyboard

c) power button

Q.6 What does the monitor do? Circle the correct answer:

a) Monitor prints out documents.

b) Monitor shows images and texts on the screen.

c) Monitor stores documents.

Q.7 What is on this picture:

Answer: _ e _ b _ _ r _

Q.8 What is this?

Answer: m _ _ _ e

LESSON 21
Multimedia Concepts

SCORE

1. The interaction between a user and a multimedia program involves the use of text, graphics, audio, video and animation.
    True
    False

2. In ICT, multimedia is the presentation of information by using a combination of text, audio, graphics, video and animation.
    True
    False

3. Multimedia applications like edutainment are a combination of education and experiment.
    True
    False

4. In medicine, doctors can practise or be trained in performing high-risk surgery by using virtual surgery.
    True
    False

5. Computer-Aided Design (CAD) is an example of multimedia used in creating movies.
    True
    False

4. The multimedia element that makes objects move is called_____
    A. audio
    B. video
    C. graphic
    D. animation

5. In medicine, doctors can practise or be trained in performing high-risk surgery by using _____ surgery.
    A. two dimension
    B. space
    C. virtual
    D. media

6. Engineers design cars before producing them by using a multimedia application called _____
    A. Computer-Aided Design
    B. Computer-Aided Coding
    C. Computer-Aided Development
    D. Computer-Aided Documentation

7. There are _____ main elements in multimedia.
    A. four
    B. five
    C. eight
    D. seven

1. Multimedia means the use of more than one_____in communication.
    A. file
    B. number
    C. media
    D. sound system

2. Using a multimedia directory and an _____ are examples of multimedia application for finding information.
    A. text
    B. joystick
    C. voice over
    D. encyclopaedia

3. The multimedia element that explains ideasthrough a picture is called _____.
    A. audio
    B. video
    C. graphic
    D. animation

8. A combination of _____ and entertainment makes learning enjoyable in schools.
    A. training
    B. education
    C. transferring
    D. examination

9. Companies nowadays make multimedia _____ to promote their products.
    A. indirectly
    B. catalogues
    C. opportunity
    D. encyclopaedias

10. In ICT, using multimedia means using various _____ . The process involves
Match the picture to the word.

bird   dog   cat

fish   mouse   rabbit

Students and teachers of Class 1 Computers can get free printable Worksheets for Class 1 Computers in PDF format prepared as per the latest syllabus and examination pattern in your schools. Standard 1 students should practice questions and answers given here for Computers in Grade 1 which will help them to improve your knowledge of all important chapters and its topics. Students should also download free pdf of Class 1 Computers Worksheets prepared by school teachers as per the latest NCERT, CBSE, KVS books and syllabus issued this academic year and solve important problems provided here with solutions on daily basis to get more score in school exams and testsUsing A Mouse Class 1 Computers Worksheet PdfClass 1 Computers students should refer to the following printable worksheet in Pdf for Using A Mouse in standard 1. This test paper with questions and answers for Grade 1 Computers will be very useful for exams and help you to score good marksClass 1 Computers Worksheet for Using A MouseCBSE Class 1 Computer Science Worksheet - Using a MouseWorksheets have become an integral part of the education system. Worksheets are very critical for every student to practice his/ her concepts. Students, teachers and parents can download all CBSE educational material and extremely well prepared worksheets from this website. All revision worksheets, Sample papers, Question banks and easy to learn study notes for all classes and subjects have been prepared based on the latest guidelines sent by CBSE. All CBSE educational material is developed by our panel of teachers, have also been submitted by thousands of teachers and students. The study material has been carefully compiled by the best teachers in India. Worksheets have been submitted by teachers of various CBSE schools and also have been carefully developed keeping into consideration the latest CBSE syllabus.Q1.Identify the parts of computer and write their names:1. What finger is placed on the left mouse button? _____2. What finger is placed on the right mouse button? _____3. Where do we fix the tail of the mouse? _____4. What do we call the small arrow moving on the monitor? _____5. Write any two uses of mouse. _____Q2. Fill in the blanks using the hints given in the box:1. _____ clicking opens the item.2. _____ clicking selects the item.3. 'Click' means pressing the _____ button on the mouse.4. The mouse is kept on a _____.5. The small arrow which we see on the monitor is called _____Q3.Label the parts of mouse given in the following figure: Q1.Identify the parts of computer and write their names:1. What finger is placed on the left mouse button? Index button2. What finger is placed on the right mouse button? Middle finger3. Where do we fix the tail of the mouse? CPU4. What do we call the small arrow moving on the monitor? Mouse Pointer5. Write any two uses of mouse. Draw pictures and open and select icons on the desktop.Q2. Fill in the blanks using the hints given in the box:1. Double clicking opens the item.2. Single clicking selects the item.3. 'Click' means pressing the left button on the mouse.4. The mouse is kept on a mouse pad.5. The small arrow which we see on the monitor is calledInt Mouse poier.Q3.Label the parts of mouse given in the following figure:Please click the below link to access CBSE Class 1 Computer Science Worksheet - Using a Mouse Click to View or Download pdf file › Click for more Computers Study Material › Evaluation of the Answer Books is done under a well-settled Policy. To ensure that the evaluation is error free, CBSE is taking several steps. After strictly following these steps, the result is prepared. Though, CBSE is having a well-settled system of assessment,... Datesheet for CBSE Board Exams Class 10 (Scroll down for Class 12 Datesheet) Datesheet for CBSE Board Exams Class 12 CBSE vide Circular No.Acad-51/2021 dated 5th July, 2021, notified that in the session 2021-2022, Board Examinations would be conducted in two terms, i.e.. Term I and Term II. This decision was taken due to the uncertainty arising out of COVID 19 Pandemic. Term I... UNESCO has declared 21st February of every year to be celebrated as International Mother Language day to promote dissemination of Mother Language of all, create awareness of linguistic and cultural traditions and diversity across the world and to inspire solidarity... A computer mouse goes through a lot of wear and tear throughout the day. Compared to other computer peripherals, they often have the shortest lifespans. If you have an old computer mouse or even a damaged one, don't throw it away. Repurpose the mouse, so it doesn't add to the burgeoning e-waste worldwide. Here are five ideas to help recycle an old computer mouse. The ideas below are organized from the easiest (which needs basic skills) to the more challenging (which requires technical skills). An oval orb on top of a Christmas tree can be a geeky delight. Use the mouse as a core and cover it with red felt or bright fabric to make your own Christmas tree ornament. If it's a wired mouse, use the wire to hang it to the tree. The unique shape of a computer mouse is similar to soap. Both are designed for easy grip. Remove the electronics inside the computer mouse and use the hollow as a traveling soap case. Alternatively, you can cut a slot on the front and use it as a toothbrush holder stuck to the washroom wall with a self-adhesive wall hook. You must have heard about DIY bottle art. Take the same art supplies and explore how to beautify a mouse. It can be a school project for children or hobby activity. Choose the paint and mix and match it with other craft materials. Online stores like Amazon sell complete craft kits for a variety of projects. Have some electronic skills backed up the easy availability of cheap components? Try your hand at this working drone made from a computer mouse. A project by THANG Engineer on YouTube can be your inspiration. A computer mouse comprises a printed circuit board, other electronic components, and recyclable metals and plastic inside it. You can even salvage the rubber trackball of non-optical mice for something useful. Also, some of the electronics have hazardous metals like lead and cadmium. So, recycling a computer mouse is a better option than throwing it away as e-waste. The ideal way to dispose of an old mouse is to use a local recycling center. Also, search the manufacturer's site for any recycling programs. For instance, Logitech has a global recycling program trying to minimize e-waste. Dell has mail-back programs and a partnership with Goodwill locations around the U.S. which takes back any computer or computer accessories. Is your old mouse in working condition? Freecycling is a more sustainable alternative to recycling. Please find a local freecycling chapter or a website that can find a new user. A video from Electronic Recyclers highlights some of the usable parts from a broken mouse. The five ideas above are a jumping-off point to search for more ways to repurpose the old mouse. For instance, you can use the trackballs from several non-optical mice as a cat toy or use the plastic casing as a soap mold. Make it a thumb rule to think of a creative recycling idea before you discard an old computer mouse. FAQ What was the original name for a computer mouse? Douglas Engelbart invented the first computer mouse in the 1960s. He received a patent for the invention, known as the "X-Y position indicator for a display system." Early on, this device was nicknamed "mouse" because of the position of the cord. How do I know if my computer mouse is getting old? If your mouse freezes often, the buttons and scrolling are unresponsive, or it struggles to connect to your computer, these are signs your mouse might be failing because of age. If your mouse doesn't perform well, possible solutions include replacing the batteries, updating drivers, or repairing a Bluetooth connection. Check out our guide to fixing a broken mouse for more troubleshooting help. Thanks for letting us know! Tell us why!
